

Federal Office
of Civil Protection and
Disaster Assistance

Warning of Hazards

preparation – awareness – action

The next
**Nationwide
Alert Day** is on
14 September

Bürgerinformation

BBK. Working together. Living in safety.

How will information be provided?

Hazards can occur suddenly and unexpectedly. Official warning messages provide important information on the situation: **What happened? Where did it happen? What can I do?**

The information is meant to reach as many people as possible. That is why there are different ways of spreading information:

Radio & Television

Digital information screens

Loudspeaker vans

Websites

**Family and friends,
neighbours**

Mobile phones

Sirens

What can you do?

Warning App NINA: Install the Emergency Information and News App NINA of the Federal Office of Civil Protection and Disaster Assistance (BBK) on your mobile phone. Add regions in the app to subscribe to hazard information that is relevant to you. Find out what to do in an emergency and how to prepare.

Tips for emergency preparedness are available in the warning app NINA or at bbk.bund.de/EN.

Cell Broadcast: If your mobile phone has Android version 11 or iOS version 16.1 (or later) installed, you can also receive alerts directly to your mobile phone via the Cell Broadcast service. Your device must be switched on and have phone service.

For more information, please visit bbk.bund.de/cellbroadcast (available only in German).

Radio and television: Almost all German-language radio and TV stations are connected to the German warning system. In an emergency, tune in to your local radio or television stations to receive up-to-date information.

How can you help?

Your contribution is important! You can pass on information – to family and friends, to neighbours and colleagues, to people on the street or on the bus. This way you can help spread news of imminent danger and everyone can prepare, even the people we could not reach via mobile phone, radio or other means.

What do we warn about?

Emergency number outage

Biological hazard

Bomb discovery

Chemical accident

Conflagration

Flooding

Risk of infection

Missile attack

Contaminated drinking water

Forest fire

Emergency preparedness? Easier than you think.

Familiarise yourself with possible risks and the German public warning system. This will help you better protect yourself and others when it matters most.

You can find useful tips, detailed information and various brochures under “Prepare for disasters” at: www.bbk.bund.de/EN

This is what the siren signals mean

Danger warning

Siren wail (ascending/descending tone)
that lasts one minute

Warning – danger. Find more information.

All clear

Continuous siren tone that lasts one
minute

All clear – no more danger.
